AEC Network License Manager, Version 11.19.0.0  
AEC AB, Sweden  
www.aec.se  
\*\*\*\*\*

## INSTALLATION INSTRUCTIONS

AEC Network License Manager requires administrative access.

### AEC Network License Manager

Double-click the appropriate exe file depending on your Operative System and Internet Protocol version. Read the information in the Welcome dialog and press Next. Read the license agreement, accept the conditions and press Next. Press Install to start the installation and finally, press Finish to exit the Wizard.

### License File

Copy your license file to the License folder in your destination folder.

### FlexLM Server

Double-click the lmtools.exe file and select the Config Services tab. Enter an appropriate name of the service and browse for the lmgrd.exe file, the license file and the predefined debug log file in the Logs folder. Check Use Services and Start Power at Power Up before saving the service. Switch to the Start/Stop/Reread tab and start the newly created service.

## OPERATING SYSTEMS

AEC Network License Manager 11.19.0.0 supports Windows Server 2022.
